To Program

1. While light is off, hold button down for 2 seconds until light turns RED then let go
2. Now click to find the 1st color you want then hold button down until light turns RED to save that color (The blank color when choosing is to make no color or a space)
3. Click again and repeat to choose your 2nd and 3rd color choices
4. Once the 3rd color is saved the light will turn off showing you have successfully programmed the light.
5. Now you can push the button to turn on the light and scroll through the modes with your custom colors with each additional click.

To shut off the light hold the button down for 2 seconds and light will shut off
